

Did you know that there is a current skills shortage of Building Services Design Engineers in the North of England?

We are currently looking for Mechanical/HVAC Design Engineers, Electrical Design Engineers and Public Health/Drainage Design Engineers in Manchester.

Manchester is notable for its architecture, culture, music scene, media links, scientific and engineering output, making it a perfect location to live and work!

I am working in conjunction with the AIIR and Catalin Lungu These firms provide services to transform the built environment and restore natural environment, and their expertise ranges from environmental remediation to urban planning, from engineering iconic buildings to designing sustainable transport networks. To be considered for the role you must be able:

- Work within a mechanical, electrical and public health (MEP) discipline team providing design and technical breadth.
- Take senior role allied to their discipline and be the clients' main point of technical contact.
- Carry out detailed calculations appropriate to the discipline and review the work of others accurately.
- Demonstrate a strong commitment to the development of Building Services.

If you are considering a move then please contact me today on the details below.

We look forward to welcoming you to Manchester.

Why Manchester?

- Manchester is the third biggest city in the UK
- House prices lower to buy or rent than the current UK average
- Lower cost of living
- Salaries equivalent or higher than the UK average
- Work on prestigious projects and gain recognised qualifications
